Available Finishes

- Polished stainless steel
- Satin stainless steel

Specify at time of order

· Finish required

Installation Instructions

- Determine appropriate glass sizes by referencing the Pool Fence Guide on the page C7c or referring to a suitably qualified engineer for use in balustrades.
- 2 Fix mini post to structure in desired location using suitable fixing method.
- 3 Install glass into mini post, place cover plate on and secure by tightening 2 x M10 grub screws onto flat clamping plate.
- 4. Final adjustment as required and then re check all screws are tight.

Note: For concrete decks we suggest HILTI HVU+HIS-RN M10 or equivalent anchors.

As construction of timber decks vary infinitely, we recommend consultation by a suitably qualified engineer to certify appropriate use in each application.

Installers should check with anchor manufactures for minimum distance from the slab edge.
